

Blogs For Change

Thank you for supporting my "You and the World" project. This is a project was introduced by my English class in Science Leadership Academy as a Freshman. It allows teenagers to think about a issue that they are interested and provide a possible solution to that problem. This website is my way to broadcast this issue to a boarder audience and to gain awareness. Thank you for viewing this website.

If you want more information about genetic engineering, please visit my blog posts.
