Cole Hinton

Facts

- The average cost of a slave around the world is 90\$
- It is estimated to be 27 million slaves around the world
- Half of trafficking in the world is done by children under 18
- The slaves usually don't get help because they think they or their family will get hurt

Cocoa Slaves - Nestle

The children were forced to farm cocoa without pay. Some of the children were brought there by their mother because their dead passed. This is forced child labor. The reason this is still going on is because so many people buy chocolate it's ridiculous. Some people have stopped buy Nestle chocolate. I think a good way to prevent this from continuing this is by bringing it to the public more often. A lot of people are unaware of this and it would be helpful if they knew.

Poverty and Slavery in Africa

Even though slavery was abolished years ago, and countries are now politically free, there is a new type of slavery happening now. Today in Africa, people live off of a dollar a day. People die each day because of lack of food, water, and diseases. Children are being used as and forced to be slaves for military uses, harvesting crops, and sex trafficking.

CHILD SEX TRAFFICKING

Child sex trafficking is simply human trafficking except it's being forced onto minors. "Human trafficking is the illegal trade of human beings, mainly for the purpose of commercial sexual exploitation or forced labor."

Child sex trafficking cont.

Child sex trafficking is now the world's second largest crime after drugs in the U.S.

Every year there are about 1.2 million child victims, the average age where this may start is at the age of 12. "An average serial child molester may have as many as 400 victims in his lifetime. *Child Sexual Abuse Prevention Study*"

Do you believe that America is a slavery free place? If you believe you're believing a big lie. Sex trafficking is a issue in the U.S., mostly in California. Sex trafficking is when people are forced to sell their bodyies for sex. In such a beautiful State the ugliest things happen. 100,000 children estimated in the U. S. are current victims of sex trafficking. One of the reasons why California has such a high sex trafficking rate because of the state's size. It's population is estimated to be 37,253,956 people. California is also venerable to sex trafficking because of the close border to Mexico
