

You Come First

Verse 1:

The way we were
Only you I preferred
Somethings should always be
Me for you, you for me

But you lost your nerve
Now where do I turn?
I can't find the words
That'll make you return

Pre-Chorus:

I'm gonna search and search just to find
All the reason that'll tell me why
Don't want what we have to just past by
Until I fight to get back what was mine

Chorus:

Even at your worst, I know your worth
For me this hurts, but you're the one that comes first

Verse 2:

Time passed by
Waiting for you to reply
Were you out doing wrong
Or am I just coming up with thoughts

What's the point in waiting anymore
Why do I question if I'm yours?

Pre-Chorus:

I'm gonna search and search just to find
Any reason that'll tell me why
Don't want what we have to just past by
Until I fight to get back what was mine

Chorus:

Even at your worst, I know your worth
For me this hurts, but you're the one that comes first

Bridge:

I know I'm a fool for playing your games
Should I go or should I stay
I give all my time and all my strength
Just for you to come my way
But how can I walk straight
When you always lead me astray
You're the force that blows me away

Pre-Chorus:

I'm gonna search and search just to find
Any reason that'll tell me why
Don't want what we have to just past by
I'm going to fight to get back what was mine

Chorus:

Even at your worst, I know your worth
For me this hurts, but I'll always put you first
