

Life of a gamer!

The reason i made this side because i want to show everyone my passion of video games. The reason i made this design for the side like this because i want it to be colorful but i didn't want too much color so i want with a simple color. I know video games was my favorite thing to play so that influenced and my me magazine help me a lot to choose this design. I also used kerning which let my picture come a live. I loved the way bleed off the page it gave the side design.
