Set Design

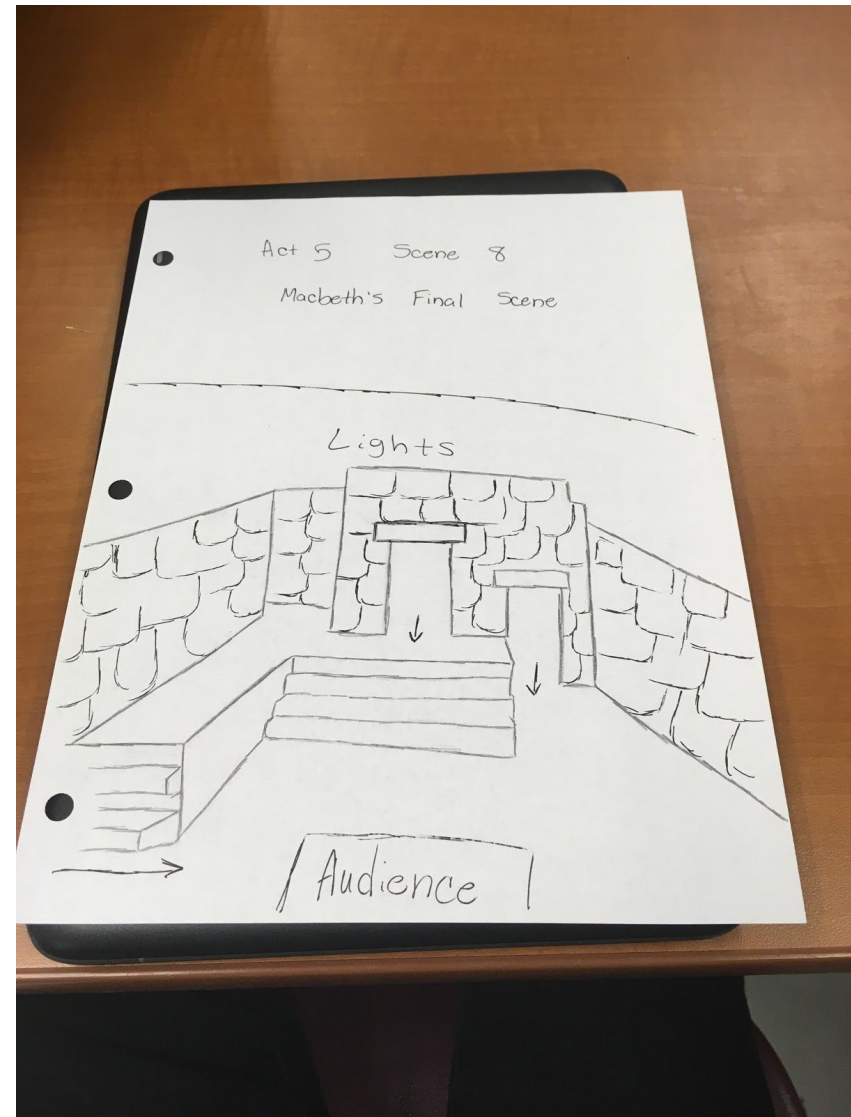

This set design represents Act 5 scene 8 where Macbeth tries to defend his position as king & also represents the site of Macbeth's demise as he is killed by Macduff who was not born of a woman as there was a c-section during his birth. Macbeth is both executed and is then beheaded ending the cruel irony of his reign.

Set Description-

Beam/Black line- Represents the lighting

Walls- The set is a more modern version so the set is more condensed.

3 entries- The entrance near the audience is the site where Malcolm's army enters to take over and the top entrance represents where Macbeth enters before he battles Macduff and the bottom entrance near the steps is connected to the watchtower where Macbeth notices Burnside wood moving closer to his kingdom.

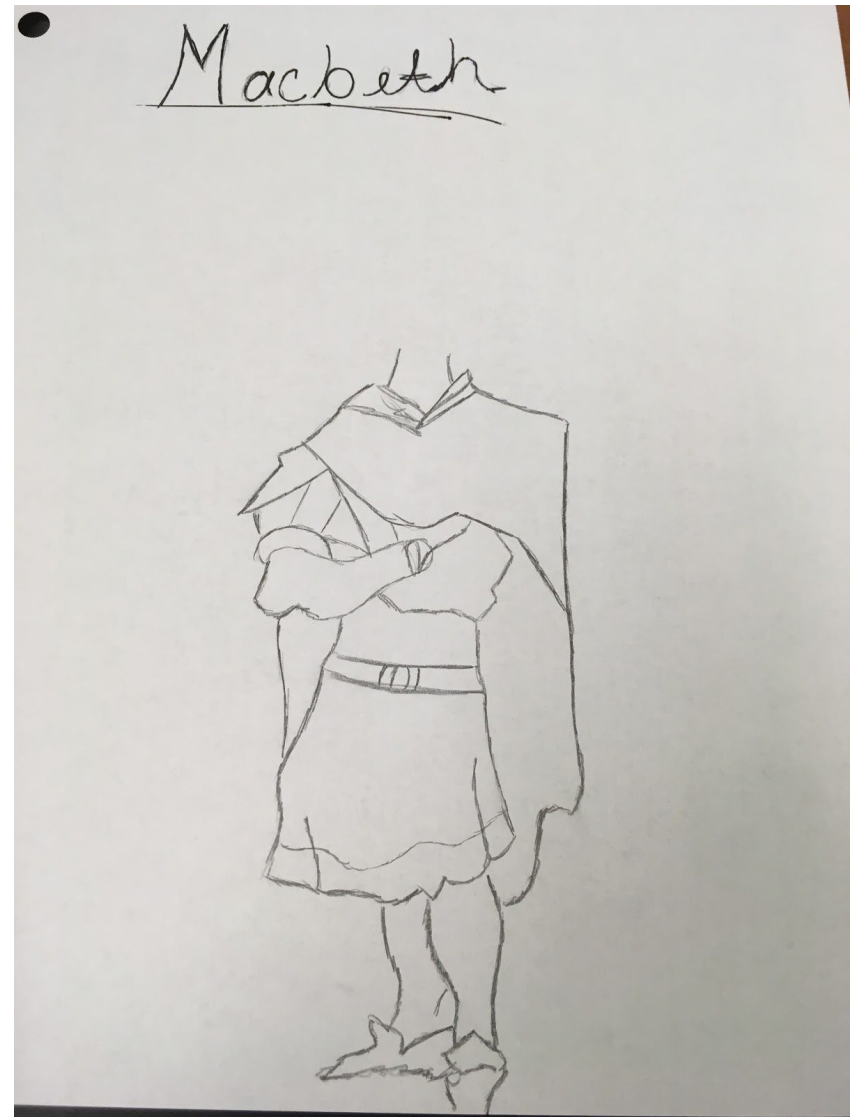

Lady Macbeth

The costume of Lady Macbeth for me represents her after becoming queen the dress is extremely big and is full of ruffles and fits the style of a queen.

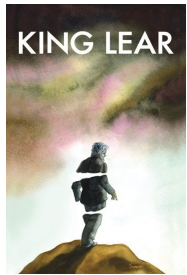

Macbeth

Macbeth's clothing in the play pretty much stays the same throughout the play dressed as a noble warrior.
