

# Rear Window

## Q&A

1. What was your biggest and most difficult moment when you made this film? I think they would say it is the window scene when LB falls out the window, they had to make sure it was perfect and that nobody got hurt even though there was a blow up landing bed or something.
2. How many times did you have to make changes to the scene/movie? I will say it a lot of times. It was funny and very different. Every scene you do it's not perfect and it's okay to have to restart, it takes a lot of encouragement to re-try something.
3. What was the easiest part of making this movie? No movie is easy to make. I say the easiest part is meeting new people and being a part of a new feeling. When you act sometimes your whole life turns into the person you are in the movie for the moment and sometimes you can relate.
