

ABOUT ME.

-Maya

Dear Readers,

Welcome to my letter, I'm glad that you're here. This is just about what my project/magazine is going to be about. My project is about me of course. But its kinda going to be on the personal side of me. This side of me people don't see often. I kind of the type of person who hides their feelings and emotions. I'm also the type not to be so open with people. This letter took some time to write because I'm not really vulnerable. So yes, this letter is hard to read right now for me but I did so, the project contains things about me like, my likes, my interest, and just interesting things about me. I hope you enjoy my project. But before I go, just a little about me, I am 14 years old, I love music, and love to cheer. I also love shopping and drawing a lot. I like putting outfits together. I don't have a favorite color. I change it every week. I like to cheer, dance, and hair. Thank you and I hope you enjoy!!

Passion: Dancing

My big passion of mine is dancing. Dancing is basically my favorite thing to do. I first got introduced to dancing on tv. I was just two years old. I don't remember it, but my mom used to take videos of me dancing and watching it on the tv. I liked it and fell in love with it immediately. I do remember when I was a bit upset, I would turn on music and dance. It would automatically make me feel so much better. It makes me happy and it was an escape from the trouble I was facing. Ever since I was little, I have been an active lively child. I love the sound of music and was hearing a couple of rhythmic sounds. I dance uncontrollably. So yes, dancing is my
