

Capstone Meeting Formal #1

<https://docs.google.com/document/d/16aV0xFBwPgUfH2jp3WVbcxcGrc-tqZpt2A3s42K3GvY/edit?tab=t.0>

- Mr.Hernandez approves
- Idea makes sense
- He will mentor
- Do not you how to make or research it?
- Research how to make Chrome extension with html css and javascript. Only learn what is needed
- Make a
- Chrome Extension/Cookie Clicker
- Not only have it run on my computer but have it run on another computer.
- Make a visual prototype/ find HTML and JavaScript rapid model view application development.
- Get data out of canvas Noah Frank how did he find out

Howfinity. "How to Block Websites on Google Chrome." YouTube, 21 Jan. 2022, www.youtube.com/watch?v=PBmLu7hsoXg. Accessed 17 Jan. 2025.

"When I was first beginning the project, one of the first things I did was look for how to block certain websites. When I was doing this I searched up how to block websites using HTML Javascript and CSS, using these methods I found this video here. This video created by Howfinity, showed me two different ways I could block certain websites. The first method was using an app called Blocksite, the other method had you going into the code of Chrome itself. I feel like that is going to be quite good for me when I am coding the website."

PedroTech. "Coding a Chrome Extension in JavaScript Tutorial." YouTube, 27 Jan. 2021, www.youtube.com/watch?v=zHlryKuhYA4. Accessed 17 Jan. 2025.

"This source was also found during the beginning section of my Capstone, this video called Coding a Chrome Extension in JavaScript Tutorial, made by PedroTech, was not as helpful as I had hoped. The Majority of the video was just him coding on a website. Only at the end did he talk about the Chrome extension, but even that part of the talk was lacking in the details that I needed. So overall this video did not have what i was looking for. But it still has some coding information in it. So I still believe that I can get some data from it."

Oston Code Cypher. "How to Build a Custom Google Chrome Extension. HTML,CSS & JAVASCRIPT (Only)."YouTube, 18 Nov. 2018, www.youtube.com/watch?v=de7XRW-Cywo. Accessed 17 Jan. 2025.

"This video like the other video is here to help me with the creation of a Chrome Extension. The video is called How to Build a Custom Chrome Extension, and it is created by Ostons Code

Cypher. This video is quite different from the other one, as this one is a lot more organized with its information, having various times pressed to show important info. I plan on using this video as a guide to help me later on with on certain issues that I might encounter with websites. Hopefully, this video will be more helpful than the other video that I have saved. "

"Sandvich Maker" Codepen.io, 2025, codepen.io/SirAndrew4/pen/RwXzjRj?editors=1010. Accessed 17 Jan. 2025.

"When I had first found the code pen I needed to make sure that the coding app that I use was to my liking. In order to find this out I made this silly little game on the computer, I mostly followed a YouTube video on how to create this website, but when I was testing it, I had an error that I could not see or find. In order to fix this I decided to go to my teacher Mr.Hernandez for help. He then showed me that I just made a minor spelling mistake. This is one of the reasons why I'm working in 509."

"Website Blocker." Codepen.io, 2024, codepen.io/SirAndrew4/pen/PwYWGaX. Accessed 17 Jan. 2025.

"This is what I plan on turning into my capstone. The current version that I have does not have much data on it, for when I got started with the coding, I got hit with a whole lot of different college admissions. This had made me spend less time on the capstone than I would have wished for. But hopefully, I can turn what I have here into my website-blocking app that I need it to be. I plan on working in the 509 room to hopefully get more help from my teacher when It comes to the coding part of this project."

W3Schools."HTML Canvas Reference." W3schools.com, 2019, www.w3schools.com/tags/ref_canvas.asp.

"This is one part of the website called W3Schools, I plan on using this part of the website to help with the HTML Section of the coding project. Because the website OpenPen uses 3 different coding websites at once I will need all the help I can get with the coding of the website. Hopefully using this website using all 3 of the languages that the Open Pen is using will help make the progress of coding a lot faster than using 3 different websites. I also believe that I have used this website before, so this might be even more useful to me than I thought."

W3Schools."JavaScript Tutorial." W3schools.com, 2019, www.w3schools.com/Js/.

"This is one part of the website called W3Schools, I plan on using this part of the website to help with the JavaScript Section of the coding project. Because the website OpenPen uses 3 different coding websites at once I will need all the help I can get with the coding of the website. Hopefully using this website using all 3 of the languages that the Open Pen is using will help make the progress of coding a lot faster than using 3 different websites. I also believe that I have used this website before, so this might be even more useful to me than I thought."

W3Schools."CSS Tutorial." W3schools.com, www.w3schools.com/css/default.asp.

"This is one part of the website called W3Schools, I plan on using this part of the website to help with the CSS Section of the coding project. Because the website OpenPen uses 3 different

coding websites at once I will need all the help I can get with the coding of the website. Hopefully using this website using all 3 of the languages that the Open Pen is using will help make the progress of coding a lot faster than using 3 different websites. I also believe that I have used this website before, so this might be even more useful to me than I thought."

"SirAndrew on CodePen." CodePen, 2025, codepen.io/SirAndrew4. Accessed 17 Jan. 2025.

"When I was looking for an app to use for coding. I wanted to make sure that It could use HTML JavaScrpit and CSS at the same time. That way I could meet all the qualifications that Mr. Henadnez had asked me to do. The biggest issue was finding a website that I liked and did not cost me. Others looked more confusing, but then I saw a video on how to make a cookie clicker, I liked the website so I went searching for it and found Open Pen. I must admit, I find the design of the app to be quite useful. I hope it can stick."

"Tiiny Host." Tiiny.host, <https://tiiny.host/manage>

"The most important part of the website is finding some way to put it onto a website for others to go and find it. "When I was looking for a website I could Use I would hope that it can be free to use. This is why I am giving Tiiny Host a chance. However, I haven't tested the website yet, because It does not work with the school laptop. I am hoping that it is going to be free and useful to use. And even if it does not work I can always find another one in the future since this is probably something to be done in the 4h quarter."
