

Framework Tech. (2023, July 14). *Master HTML with Visual Studio Code | Beginner's Guide* [Video]. YouTube. <https://www.youtube.com/watch?v=fzWdtSGRVNo>

- This is an HTML guide for Visual Studio Code, the free tool that I am using. It's a current guide, and it focuses on the HTML aspect of this project, which is the user-facing side, and very important.

Visual Studio Code. *JavaScript Programming With Visual Studio Code*. 3 Nov. 2021, code.visualstudio.com/docs/languages/javascript.

- This is a JavaScript guide for VS Code. I have experience in JavaScript, but not in creating models that process data. This is going to help me write the backend of my website.

Codecademy. "Getting Started With Visual Studio Code and Building HTML Websites."

Codecademy, www.codecademy.com/article/visual-studio-code.

- Here is another source that I think will be very useful in helping me learn to make websites with HTML and JavaScript integrated. The view and the model are different pieces that I doubt will be very difficult to assemble, but it is a challenge to combine them.

Chatfield, Sara. *The politics of bathroom access and exclusion in the United States*. 2024, <https://doi.org/10.1017/9781009429085>.

- This is a book on the political and class issues involved in bathroom access policy in the United States. Daphne is the only largely working on the op-ed side of our project, but this is an issue that I'm curious and passionate about. I've already begun to read select chapters of this book and will continue to read to better understand the issue we are facing.

Leonard, Jayne. *What to Know About Ally's Law*. 25 June 2024,

www.medicalnewstoday.com/articles/323078.

- This is a Medical News Today article on the laws surrounding bathroom access for individuals with certain medical conditions. Interestingly, the Restroom Access Act or Ally's Law has not been passed in Pennsylvania, which might open up a new lane of inquiry into learning about grassroots organizations working to pass this and similar legislation in our state.

"Updates on the Philadelphia Public Restroom Pilot | Health and Human Services." City of Philadelphia, 16 Aug. 2022,

www.phila.gov/2022-08-16-updates-on-the-philadelphia-public-restroom-pilot.

- I chose this source because it outlines steps taken by the city to help the bathroom crisis. It's a newsletter published by the City of Philadelphia, outlining a new project to integrate a product called the Portland Loo into Philadelphia parks and areas of high foot traffic. The Portland Loo is a single restroom unit that seeks to meet demands for more public restrooms without involving businesses and private properties.

Phlush. "Why Public Toilets? - Phlush." Phlush, 29 Oct. 2024, www.phlush.org/why-public-toilets.

- This is a primary source from the service that the city of Philadelphia is employing to install and maintain the Portland Loos. They examine why they are important to the city and what next steps are needed.

Zoerb, Andreas. "Find Public Toilets, Free Public Restrooms and Toilet App - Worldwide - Freepee - Add Public Restroom." freepee.org, www.freepee.org/add-toilet.html.

- This is an example or jumping off point for the design of my website. It has almost no data centered on Philadelphia, so I wanted to make mine solely Philly-centric. It has a simple design, and includes a search bar. I may reach out to the creators of this web app to see if there's anything they wish they had included. As I navigate the world these next few weeks I will be using this app and seeing if it is easy and simple to use on a cell phone while out and about.

Starbucks Corporation. "Our Coffeehouse Code of Conduct." About Starbucks, 13 Jan. 2025, about.starbucks.com/code-of-conduct.

- This is Starbucks' recently updated code of conduct, which gives them the right to kick anyone out of the facilities for basically any reason. It's a vague policy that seems aimed at ridding Starbucks sites of homeless people. I want to look at company policies more in depth to decide if I count their bathrooms as free and public. So far, Starbucks' bathrooms are toeing the line. Their new policy states that their bathrooms are "for use by [their] partners and customers," so more research must be done to determine the enforcement of this.
- I could potentially make a location specific determination of public vs customers only enforcement, but that would be only for those who look like me: white girls who are obviously students.

"10 Principles of Good Web Design — Smashing Magazine." Smashing Magazine, 31 Jan. 2008, www.smashingmagazine.com/2008/01/10-principles-of-effective-web-design.

- This is a guide to making accessible and user friendly websites. I want to potentially gear this project towards the elderly, so the design is very important because the elderly tend to struggle with using technology, and it will take a lot more thinking about what is intuitive for this demographic.

Hosting a Website on Google Cloud Platform | Google Cloud Platform Website Hosting | Edureka

- Big scary
